5. Deed Book reference for
Property to be served: _____
6. Property Address to be served: _____
7. Township where Property to be served is located: _____
8. Is the Property to be served located within Sanitary sewer service area
for the Pen Argy Municipal Authority as approved by the Township and DEP?
Yes _____ No _____

The undersigned property owner(s) hereby requests the Pen Argyl Municipal Authority to permit the Property Owner to connect the above Property to the Pen Argyl Municipal Authority Sanitary Sewer System (the System) line located in the bed of _____(Street name).

The undersigned has deposited the sum of Two Thousand Dollars (\$2,000.00) with the Authority as an application fee. This fee shall be used to defray the engineering costs and/or legal fees to be incurred by the Authority in reviewing this application, including any plans or designs submitted by the Undersigned, and, if approved, preparing any required agreement(s).

The undersigned acknowledges that:

- (1) authorization to connect the Property to the System is contingent upon approval by the Authority in the Authority's sole discretion;

(2) the undersigned will be responsible for all engineering and legal costs incurred by the Authority pursuant to its review of this application, whether the Authority's approves or denies this Application;

(3) If the engineering and legal costs exceed the initial deposit of \$2,000, the undersigned may be required to deposit additional funds during the review process;

(4) the undersigned will be entitled to a refund of any unused funds deposited by the Applicant with the Authority upon the termination of the review and/or issuance of a permit to connect to the System,

(4) the undersigned will be responsible for all construction costs associated with the connection to the System by the undersigned, and

(6) the undersigned will be required to pay a tap-in fee (currently \$2,200) and an inspection fee (currently \$150) prior to being permitted to connect the Property to the System and/or discharge waste into the System.
